PROFILE

Technical game designer with over seven years' experience shipping PC, mobile and VR titles, now leading both design and programming teams. I turn creative direction into systems that ship, including combat, progression, economy and deck-building frameworks, and take them from design document to working code in Unity (C#) and Unreal (Blueprints). Currently Technical Director at Creative Mob Studios and Lead Programmer on Kibo and the Cursed Lands.

EXPERIENCE

Technical Director

Oct 2025 – Present

Creative Mob Studios · Conqueror · Unreal Engine · Remote, volunteer

Promoted from Lead Designer to Gameplay Programmer to Technical Director

- Oversee the design and programming departments, and work with the other directors on company direction and marketing strategy.
- Authored the core design documentation for combat, skills and spells, enemy design, level design, economy, and a squad command system.
- Implemented skills and spells in Unreal Engine using Blueprints.

Creator & Lead Developer

2026 – Present

Unannounced title · Published by Creative Mob Studios · Unity · Team of 2–3

- Built a technical demo of my own IP and pitched it successfully to Creative Mob Studios, who took it on for marketing and publishing.
- Designed and built a custom 2D shadow system that projects sprite shadows from a moving day/night sun using simulated object height, with live in-editor preview for the team.
- Now in closed alpha testing, targeting release in Q1 2027.

Lead Programmer

Jun 2025 – Present

Eleos Games · Kibo and the Cursed Lands · Unity, C# · Remote, volunteer

- Lead a 5-person programming team within a 60-person project, including hiring, onboarding and mentoring junior and mid-level programmers.
- Designed and implemented much of the combat system.
- Rebuilt the enemy finite state machine on Unity's newer systems as a scalable, reusable framework, noticeably improving how enemies track and follow the player.
- Implemented a wide range of UI features, and advise on implementation and design across disciplines.

Contract Game Designer

Mar – May 2026 · Sep 2026 – Present

Polynormal · Oil Is Thicker Than Water · Remote, contract

- Turn the creative director's vision and intended player feelings into documented, prototyped systems for a psychology-driven roguelite deck-builder.

ALEXANDER KERR

alexander.william.kerr@gmail.com · +44 7360 588459

EXPERIENCE, CONTINUED

Founder & Solo Developer

2024 – 2026

Awkward Wolf Studios · Suit Up · Unity, Photoshop

- Designed, developed and self-published Suit Up on Steam as a solo developer.
- Handled the full product lifecycle, including production, marketing, community and store publishing.

Senior Game Designer

Jun – Dec 2023

Fin Fin · Fashion League · Unity, Proto.io · Team of 20

- Designed the core gameplay mechanics and the logic for how clothing items and styles combine, keeping it systematic to build while preserving player choice and fun.
- Designed the in-game economy and the mini-games that support it.
- Designed the daily engagement loops that keep players returning.

Senior Game Designer & Product Manager

2022 – 2023

Bloktopia · VR metaverse · Unity, VR · Team of 10

- Designed UX, environments and VR-specific mechanics during the project's early development.
- Wrote specifications, user journeys and work orders that turned business requirements into buildable features across teams.

Lead Game Designer & Producer

2021 – 2022

Smart Dev / VeryPlay Studios · Vietnam · Unity · Team of 6

- Took three hyper-casual titles from concept to release on iOS and Android.
- Managed a team of developers and artists, keeping communication clear across disciplines.

Game Designer

2019 – 2020

ABI Studios · Vietnam · Unity · Team of 6

- Sole designer across puzzle, action, word and casual titles, including crafting systems and skill trees.
- Revised live games based on analytics and player feedback.

SKILLS

Design
Systems and combat design, economy and progression, deck-building systems, level design, UX/UI, GDDs and specifications, rapid prototyping

Engineering
Unity, C#, Unreal Engine (Blueprints), FSM and gameplay architecture, UI implementation

Leadership
Team leadership, hiring and mentoring, cross-discipline direction, product management, Steam publishing, marketing strategy

Tools
Git, Perforce, Jira, Confluence, Notion, Miro, Proto.io, Photoshop, Aseprite

EDUCATION

BSc Computer Gameplay, Design & Production · Staffordshire University — 2011 – 2015

BTEC Music Performance, Theory & Production — 2008 – 2010
