PROFILE

Technical product manager and C# developer with over seven years taking interactive software products from concept to release on mobile, PC and VR. I write the specifications and user journeys, lead the cross-functional teams that deliver them, and can build the product myself when needed. Comfortable moving between stakeholders, designers and engineers, and turning loosely defined ideas into clear, buildable requirements.

KEY ACHIEVEMENTS

- Promoted twice within a year at Creative Mob Studios, from Lead Designer to Technical Director with a seat on the leadership team.
- Lead a 5-person engineering team within a 60-person organisation, including hiring, onboarding and mentoring.
- Won publishing and marketing support for my own product by pitching a working technical demo.
- Founded a studio and shipped a product to Steam solo, owning build, release, marketing and community.

EXPERIENCE

Technical Director

Oct 2025 – Present

Creative Mob Studios · Game studio · Unreal Engine · Remote, volunteer

Promoted from Lead Designer to Gameplay Programmer to Technical Director

- Lead the design and engineering departments, and work with the other directors on company direction and go-to-market strategy.
- Wrote the product specifications for all core systems, including combat, abilities, economy and a squad command system, giving engineers clear requirements to build from.
- Built features directly in Unreal Engine using Blueprints.

Lead Programmer

Jun 2025 – Present

Eleos Games · Kibo and the Cursed Lands · Unity, C# · Remote, volunteer

- Lead a 5-person programming team within a 60-person project, including hiring, onboarding and mentoring junior and mid-level programmers.
- Re-architected the enemy state machine into a scalable, reusable framework on Unity's newer systems, improving behaviour and making it easier to extend.
- Implemented much of the combat system and a wide range of UI features, and advise on technical approaches across the team.

Creator & Lead Developer

2026 – Present

Unannounced title · Published by Creative Mob Studios · Unity, C# · Team of 2–3

- Took my own product from idea to technical demo and secured a publishing partner for marketing and release.
- Engineered a bespoke 2D shadow system; now in closed alpha testing, targeting release in Q1 2027.

EXPERIENCE, CONTINUED

Contract Game Designer

Mar – May 2026 · Sep 2026 – Present

Polynormal · Oil Is Thicker Than Water · Remote, contract

- Turned a creative director's vision and intended user experience into documented requirements and working prototypes.
- Designed the core systems and meta loop of a psychology-driven roguelite deck-builder.

Founder & Solo Developer

2024 – 2026

Awkward Wolf Studios · Suit Up · Unity, C#

- Built and shipped Suit Up on Steam, owning the full product lifecycle from development to release, marketing and community.

EARLIER EXPERIENCE

Senior Design & Product Manager · Bloktopia 2022 – 2023

VR platform, team of 10. Wrote specifications, user journeys and work orders that translated business requirements into buildable features, and communicated upcoming features to internal teams.

Senior Game Designer · Fin Fin Jun – Dec 2023

Mobile fashion game, team of 20. Designed the item logic, economy and daily engagement loops that drove retention.

Lead Designer & Producer · Smart Dev / VeryPlay Studios 2021 – 2022

Delivered three mobile products from concept to release on iOS and Android, managing a team of 6 developers and artists.

Game Designer · ABI Studios 2019 – 2020

Sole designer across multiple mobile titles, iterating live products from analytics and user feedback.

SKILLS

Product	Specifications and user journeys, requirements gathering, prioritisation, UX, analytics-driven iteration, stakeholder communication
Engineering	C#, Unity, Unreal Engine (Blueprints), systems architecture, UI implementation, AI-assisted development (Claude)
Delivery & tools	Jira, Confluence, Notion, Miro, Git, Perforce
Leadership	Cross-functional team leadership, hiring and mentoring, technical direction

EDUCATION

BSc Computer Gameplay, Design & Production · Staffordshire University 2011 – 2015
